

10 Years Of
Excellence

Enterprise Process Automation Ecosystem

Flexible, Agile, Rule-Driven and Integration-enabled
enterprise BPM Platform

Without BPM, Legacy systems don't match paces of innovation in business and face operational challenges

- Complex and expensive to modify
- Integration among multiple legacy systems is quite painful
- Customization takes time and hence resulted in poor RPOIs
- Non-flexible and rigid environment
- Non-agile and take more longer to respond

Adopt Business Process Automation With bpmEdge

It is a comprehensive platform, built on an enterprise technology, highly enriched with all requisite features to automate and manage various sorts of business process. bpmEdge can accommodate any business process from simple to complex or even a process-mesh which will enhance overall visibility and collaborative efficiency of the organization.

- Unstructured Business Process Automation: Automate simple/structured and complicated/unstructured/critical/case process effortlessly.
- Business Policy/Rule management: Build, draft and publish business policies and configure business rules, decision matrix as per your requirement.
- Monitoring Business Process: Use bench marking criticality calculation, quality assurance methods. categorize priorities, see Gantt chart of process instance, and monitor status of activities in "Traffic Light" form.
- Metadata Of Processes Anytime: Can easily access and manage metadata of any process at any time and place. Empowers stake holder to make quick decision or adjustment.
- Ad-hoc Reports Builder: Generate simple or complex reports out-of-box using wizard through process instance and activity instance data/metadata. Schedule report delivery either at one time or on the recurring intervals.

Multiple Activity Operations

- Complete activity
- Suspend activity
- Delegate activity
- Relocate activity

True BPM Characteristics

- Take less time for implementation
- Better UI
- Adhere to BPMN 2.0
- Intergration-enabled

Process Modelling Studio

- Manage and connect each technology stack of a business
- Regulate the workflow system of processes
- Automate the entire business ecosystem

Business Control Centre

- Supports complex hierarchy such as geography-based
- Manages benchmarking of processes
- Provides feature to calculate the activity criticality
- Review activities by a quality assurance operator

Flexible Deployment Model

bpmEdge can be deployed on-cloud or on-premises and offers enterprise scale infrastructure support

Recommended Server Configuration

Quad-core latest processor, 32 GB RAM, 500 GB Usable Storage HDD/SDD. Window/Linux

Enterprise-Ready Seamless Integration

- RESTful APIs/Web Services
- LDAP/AD integration ready
- Multi-tenant environment

Responsive Mobile Interface

- Attach images (captured by mobile device camera) to processes
- Add process notes using the built-in microphone including speech to text conversion
- Send emails to different workflow participants from your mobile devices

Why bpmEdge?

- Low Budgeted
- Less code, more configuration
- Unlimited users/processes
- Rule driven
- Agile & Robust
- Future Ready
